THE TOWERS AT PACIFICA INVITES GUESTS TO REACH FOR THE HEAVENS

Astronomical Night and Star Party Packages Offer ‘Best of the Best’ Experiences

Los Cabos, Mexico (December 19, 2017) - With its pitch-black skies and zero light pollution, the tip of the Baja Peninsula is a perfect place for stargazing—and the inspiration for a pair of out-of-this-world packages.

The Towers at Pacifica, the deluxe beachfront “resort within a resort” that debuted last year on a glorious stretch of pristine beach, has put together two all-inclusive packages designed to appeal to ardent stargazers and connoisseurs of one-of-a-kind experiences.

The “Astronomical Night” package features accommodations for up to four guests in the majestic Presidential Suite that commands the top floor of The Towers. This beautifully appointed 3,233-square-foot suite features indoor/outdoor living space, two king bedrooms with their own bathrooms, and private terraces equipped with a fire pit, Jacuzzi, and outdoor shower. The lavish suite also has a fully equipped kitchen and a spacious living/dining room that opens onto a grand terrace boasting magnificent ocean views.

The program features a tasting of Mexico’s most exclusive tequilas and rare mescals guided by a resident expert well versed in the nuances of these native spirits. Tequila, the first distilled spirit on the North American continent, is sourced exclusively from blue agave grown mainly in Jalisco. It is produced in *blanco* or “silver” form (fiery, with strong vegetal aromas); as *reposado*

(a mellower “rested” tequila aged for less than a year in oak); and *anejo* (aged tequila that spends up to five years in oak is served in a snifter like a fine Cognac). Mescal, on the other hand, is sourced from 25 different types of agave. The flavor profiles of this distinctive smoky distillate vary widely from one producer to the next.

Following the tastings, one of Cabo’s top astronomers will arrive with a high-powered telescope to identify planets and constellations in the night sky. Fully magnified, the cosmos, as seen from The Towers, burst to life when observed through a telescope on a typically clear night.

Along with sumptuous accommodations and an all-inclusive food and beverage program, including a special chef’s dinner at Peninsula, the resort’s outstanding restaurant, the “Astronomical Night” package features 24-hour, world-class butler service. These “artists of service” can create customized experiences and adventures for guests limited only by their imaginations. The “Astronomical Night” package is priced at \$8,000 USD.

The Towers at Pacifica is also offering a deluxe “Star Party” package for four guests that in addition to the “Astronomical Night” offerings include four “Heavenly” massages at the resort’s award-winning Armonia Spa; a fabulous Champagne beach dinner under the stars catered by Peninsula; and a tasting of Mexico’s finest wines from the top-rated Guadalupe Valley appellation in Baja California Norte. This tasting, led by the resort’s sommelier, is held around a hand-dug firepit on the beach. The exclusive “Star Party” package is priced at \$12,000 USD.
